

Csaba Gergely

Senior ATM Advisor

„As I was involved in HungaroControl’s „Remote TWR Program” from the very first scratch, I’m really proud of our achievement. I believe that this technology means future for aerodrome air traffic control and will bring the needed leap into XXI century indeed. I’m looking forward to share my experiences not only as former TWR manager, but as an active ATCO working in digital TWR in my daily routine.”

Csaba Gergely, Air Traffic Controller, former TWR manager, current occupation in the company is senior advisor to Director of Business Development.

Csaba has over 30 years’ experience as an air traffic controller and also served as Head of TWR for more than a decade. He has followed and shaped the deployment of HungaroControl’s remote tower facility from the first day and as a still active ATCO has first-hand experience with the advanced technologies that enable the Hungarian air navigation service provider to enhance safety and efficiency even in the COVID-crisis.

He is actively participating in numerous SESAR projects and is at the forefront of ATM research and development.
