

„Hamburg Airport is fully supporting the goals set out by ACI to become a „carbon net zero Airport“ by 2050. Therefore we are already part of the Airport Carbon Accreditation Programme (ACA) since 2011 to decarbonize our airport operations. Hamburg Airport has already reached the ACA Level 3 (Optimisation). Reducing, optimizing or compensating carbon emissions throughout changing our hole GSE fleet, modernizing our technical facilities in all buildings and our power plant are examples for measures that already have been taken. Together with local compensation projects realized on airport owned properties and investing into hydrogen based technologies like fuel cell and synthetical fuels, we are confident to be „climate neutral“ already by 2021.“

Michael Eggenschwiler
Chief Executive Officer, Hamburg Airport

Michael Eggenschwiler is CEO at Hamburg Airport. The 61-year old business graduate from the university of St. Gallen/Switzerland has assumed this role in March 2005 after two years as Managing Director of Hamburg Airport.

Starting his professional carrier at Crossair in various management positions, he took over a senior management role at Swissair. Michael Eggenschwiler was Member of the Executive Board at Swissair, last being responsible for sales & marketing in Swissair's home market Switzerland.

From 2007 to 2010 he acted as President of the German Airports Association ADV and is currently Board Member of the German Airports Association ADV and Bundesverband Deutsche Luftverkehrswirtschaft BDL. He is Swiss Honorary Consul for Hamburg and Schleswig-Holstein. Further he is member of the Advisory Board Hamburger Sparkasse and HDI-TALANX.

Michael Eggenschwiler is married and has two children.
