

# Kristian Vind

Project Manager & Business Developer, Sceye

---

Kristian Ullum Vind is the Danish-based project manager and Business Developer for Sceye.

He also leads the analytical work of Sceye for maritime and telecommunications markets, as well as leading the business development efforts on maritime and environmental areas and payload hardware relating to optics and data transfer. Kristian has a background in digital entrepreneurship and started out working with Sceye in 2018 as someone with technical appetite and a business mindset was needed to evaluate the commercial feasibility of intellectual property, where the battery development was the primary part.

He holds a degree in International Business at the Copenhagen Business School and is an alumnus of the exclusive Singularity University where he graduated the Global Solutions Program where he spent several months at NASA in Silicon Valley, through a full-ride scholarship from Google.
